INTRODUCTION

We have pleasure in bringing out the Third Volume of the "*Catalogue of Maps in the Bombay Archives*". The first volume was published in 1979 and the second in 1985. The first volume contained the cataloguing of the first batch of one thousand maps and the second volume was catalogue of another batch of four thousand maps. This third volume covers the cataloguing of next batch of five thousand maps, serially numbered from 5,001 to 10,000. The maps, here, are numbered according to their accession and not according to any kind of classification or division. The Bombay Archives has a rare collection of more than fifteen thousand maps, plan, charts, etc.

A large number of maps catalogued in this volume pertain to Bombay City and suburban area. These are more than 840 maps. Almost all areas of the Bombay City have been covered by these maps, e.g., Backbay Reclamation (5344-45, 5909);* Bombay (7636); Bombay Municipality (7722, 7857); Bori Bunder (6774). Girgaum (6517), Byculla (7218), Sewri (5927), Matunga (7805), Mahim (7535), Colaba (5683, 5848), Dadar (5480, 6055), Vile Parle (6930); Bombay Port Trust (7712), Malad (9770, 9811), Sion (8309), Parel (5459), Chowpatty (7276), etc.

Mostly these areas were surveyed in about 19th Century. There is a plan of proposed New Road at Bori Bunder area drawn in 1852 (6774). A number of Bombay maps are plans of Railway Stations and buildings. These maps are of 19th Century but a few maps belong to 20th Century. There is a Plan of Mazagaon showing the upper storey proposed to be raised over the quarters of the Ordnance Warrant Officer at Mazagaon (5372); a plan of Bombay in 1906 showing existing Victoria & Princess Docks, the St. George's (Euthiopean) Hospital, Victoria Terminus (5932), a map of Bombay postal circle showing the post office and postal line of 1900 (5400), are some other noteworthy items.

*The figures in brackets denote Accession Nos. or Serial Nos. of maps as given in the Catalogue.

(ii)

A number of maps in this collection are of countries out side India. For example, there is a plan of Baghdad, surveyed by Maj. H. C. Rawlinson in 19th Century showing the true frontier and extent of the contested territory of Zohab (5285). Other maps are of Baluchistan and Sind (6343), Island of Kenn in the Persian Gulf (9105), North-West Frontier Province (5016), Karachi (6319—21), plan of Karachi Municipality (6396); etc. There is a plan of the Sind Canal from Shikarpoor to the Indus, surveyed in June, 1841 (6326). There is a Map of Garhi Yasin Taluka, District Sukkur in Sind, surveyed by Land Records Office in Sind 1929, showing historical places in ruins, places of pilgrimage, Jagir village important places for fairs, forts, Hindu temples, etc. (5014). Sind Province was a part of Bombay Province for some time.

Out of five thousand items catalogued in this volume about 4550 are plans of different 170 Railway lines. For example, 1033 plans belong to Great Indian Peninsula Railway, 753 plans are of Bombay Baroda & Central India Railway, 511 plans are of Southern Maratha Railway, 462 are of Central India Railway. 366 plans belong to Indian Midland Railway, 86 plans are of Tapti Valley, 74 plans are of Rajputana Railway and 33 plans are of Jhansi Manikpur Railway. There are other local Railway plans also. No other State in India has such a large collection of Railway Plans of an all India nature.

The correspondence relating to the construction of Railways is in the Bombay Archives. A 'Railway Branch' was opened in Public Works Department of the Bombay Secretariat from 1849 to 1921. Hence these Railway Plans came for deposit in the Bombay Archives.

The Great Indian Peninsula Railway was the earliest line undertaken in India. It was promoted by a company under a guarantee of 5 per cent and the first section from Bombay to Thana (21 miles) was opened to traffic in 1853. Sanction was subsequently given for the extension of this line *via* Poona to Raichur, where it connects with the Madras Railway, through Khandesh to Jubulpore where it

meets the East India Railway and to Nagpur, where it joins the Bengal Nagpur Railway. Soon after leaving Bombay the Western Ghats are encountered; and as it was found impracticable to serve both lines by a single Railway to the top of the plateau, the line to Poona necessitated the ascent of the Borghat and that to Jubulpore and Nagpur the ascent of the Thalghat. These sections are $15\frac{1}{4}$ and $9\frac{1}{4}$ miles long respectively and the total rise is 1831 and 972 feet. There are twenty-five and thirteen tunnels and 1, 4 and 5 miles of gradients of 1 in 50 and less, the steepest being 1 in 37 for a distance of $1\frac{1}{2}$ and $4\frac{1}{4}$ miles respectively. The work commenced in 1857 and was finished in 1863 and 1865. The survey of these ghat lines occupied many working seasons before the alignment was settled and the difficulties encountered in their construction were very great. The through lines to Raichur, Jubulpore and Nagpur were opened in 1871, 1870 and 1867. In 1885 the Indian Midland system I was undertaken by a company under a limited guarantee; it extends from Itarsi on the Great Indian Peninsula to Agra and Cawnpore, with branches to Manikpur, Katni, Ujjain and Baran. The Agra-Delhi Chord Railway was opened in 1905 and made over to the Great Indian Peninsula Railway, giving it direct access to the granaries of the Punjab and Northern India. In 1900 the Great Indian Peninsula contract was terminated; and under arrangement with the Indian Midland Railway Company that line was amalgamated with the Great Indian Peninsula Railway, and leased to a company to work, the terms being that if there is any surplus after payment of certain liabilities and working expenses, nineteen-twentieths shall be paid to Government and one-twentieth to the company. The Great Indian Peninsula system as then constituted consisted of 2,988 miles 462 of which were double line, all but 183 miles being on the broad gauge. It was the third longest Railway in India under one administration. It passed through sparsely populated tracts of country, but it served several large cities and formed the route by which mails, troops and passengers from all parts of India (the portion served by the Bombay, Baroda and Central India system alone excepted) travel to and from Bombay en route to Europe.

(iv)

The Bombay, Baroda and Central India Railway is one of the original guaranteed Railways. It was commenced in the first instance from Surat *via* Baroda to Ahmadabad, but was subsequently extended to Bombay. The original contract was terminable in 1880; but the period was extended to 1905, on the condition that the line was continued to Viramgam to serve the Kharaghoda salt-works and to Wadhwan to serve the Native States of Kathiawar, on conditions, which were duly fulfilled. This portion of the system was constructed on the broad gauge and was 504 miles long, of which 251 miles were double line. In 1885 the Rajputana-Malwa metre gauge system of State Railways was leased to the company. Several additions had since been made by the lease of branches and extensions constructed by the Government, by Native States and by company independent of the parent line and at the end of June, 1905, the undertaking consisted of 868 miles on the broad gauge, 2,022 on the metre gauge and 132 on narrower gauges; a total of 3,022 miles, which made it the second longest system in India under one management. The line, beginning at Bombay, run north along the west coast to Viramgam, with branches on the broad gauge from Surat to Amalner on the Great Indian Peninsula Railway (the Tapti Valley Railway) and from Anand to Ujjain. At Ahmedabad, the Rajputana metre gauge system began and running through the Native States of Rajputana, extended to Agra and Kanpur in the United Provinces and to Delhi and Bhatinda in the Punjab. From Ajmer a branch run through Central India to connect with the Great Indian Peninsula at Khandwa. There are numerous important places of pilgrimage on the system and though the Railway passes through somewhat sparsely populated tracts, many large cities and towns are served by it.

The Madras Railway was the third of the three Railways commenced as experimental lines, under the original form of guarantee of 5 per cent. It was projected to run in a north-western direction to connect with the Great Indian Peninsula Railway and in a south-western direction to the west coast near Calicut.

The Southern Maratha Railways was begun as a branch from Hotgi to Gadag for protective purpose against famine. In 1883, in consequence of a treaty entered into with the Portuguese Government for its connection with the Portuguese Railway from Marmagao to the frontier, it was extended to Castle Rock and also to Poona and Bellary. It had since been connected with Bezwada, where it joined the Madras and Nizam's Railways and with the system of Railways constructed in the Mysore State. It was promoted by a company under a guarantee and was constructed on the metre gauge. The system comprised 1,687 miles of line, including the Mysore Native State Railway and the Portuguese Railway, which was leased to it in 1902. It served the southern part of the Bombay Presidency, the northern part of the Madras Presidency and the State of Mysore.

The Principal Native State Railways were—the Nizam's constructed by a company under a guarantee from the Hyderabad State; the Kathiawad system of Railways, constructed by subscriptions among the several Chiefs in Kathiawad; the Jodhpur-Bikaner Railway constructed by the Jodhpur and Bikaner Chiefs; the system of Railways in the Punjab, constructed by the Patiala, Jind, Maler Kotla and Kashmir Chiefs; and the Railways in Mysore, which were constructed by the Mysore State.

The Railway plans housed in the Bombay Archive include plans showing different types of Railway Stations, canals, bridges and plans of land required for Railway Stations and buildings. Map No. 6180 is a plan of the site of Bombay Terminal Station (Bori Bunder) surveyed on 22nd October 1851. This is the earliest original plan in the Railway Maps collection.

There are various types of other plans in this collection, e.g., Hubli Institute Building (7071); Land required for New jail at Parel, Bombay (5459); Bungalows surveyed by John Rabinson (5561—69); Bombay Presidency Central Portion 1879 (5663); Plan showing proposed pipe line at Matheran (5904), India (5961), Indus Steam Flotilla map showing the Chief Stations on the Banks of the

(vi).

Indus River (6595); Abu Division (6757); Plan of altered line from Khandala to Lonawala, 1856 (6755); Gun Carriage Manufactory (6836), Bombay Port Trust (7712) etc.

There are a number of bridge plans for various rivers and canals, e.g., Bassein Bridge, 1866 (7577), Bhima Bridge (1879, 7196); Damanganga Bridge, 1875 (6855), Nurbada River Bridge, 1868 (7383), Poorna River Bridge, 1873 (7408), so also Elphinstone Bridge, 1887 (6731).

Cataloguing of these maps was done by Sarvashri R. S. Pednekar, A. E. Sonawane, A. K. Kharade, P. D. Thombre, Smt. A. P. Lopez and others during their tenure as Assistant Archivists with the help of Sarvashri R. H. Bhoir, S. S. Chalke, A. S. Kamble (Clerk-Typist). The press copy was typed by Smt. V. V. Vartak and Smt. S. A. Patil. Proof-correction was done by Sarvashri R. S. Pednekar, I. R. D'souza Smt. S. S. Shirke (Archivists), R. R. Pednekar, Smt. S. .. Surawkar, Smt. A. P. Lopez, Smt. V. R. Santhamma, Smt. M. M. Amberkar (Research Assistants), and Shri A. N. Patil (Chemist) and others, Shri S. D. Bhosle, Archivist, Vidarbha Archives, Nagpur, helped in carrying this publication through the Press. I am thankful to all of them for their valued assistance in bringing out this volume. I am also thankful to Shri B. N. Chandanshive, Artist, who designed the jacket.

I am thankful to Shri R. B. Alva, Director, Government Printing and Stationery, Bombay and Shri B. B. Bracken, Manager, Government Press, Nagpur and the other technical and non-technical staff members of the Press associated with the printing of this volume for expeditiously bringing out this publication.
